I'm a web developer with solid experience in agency environments, specialising in building responsive, accessible, and design-led websites. I work closely with designers, developers, and project managers to turn creative concepts into pixel-perfect interactive interfaces. My background includes a range of CMS-driven projects, along with familiarity in PHP and Laravel, where I've delivered reliable, high-performance websites that balance creativity with usability. I'm particularly proud of building a dynamic marketplace platform that combines both front-end and back-end development, featuring dashboards, real-time messaging, and item trading to support seamless B2B interactions. I'm always keen to pick up new skills and enjoy working with teams where ideas are shared freely and everyone has a hand in shaping the final result.

Relevant Experience

Web Developer — **Pragmatic Digital**, Leeds

JUNE 2021 - PRESENT

- Developed and maintained full-stack web applications using Laravel and React, integrating RESTful APIs and handling both backend logic and frontend interfaces.
- Built and customised CMS-based websites delivering tailored solutions for content-heavy platforms.
- Implemented component-based frontends with React, focusing on reusability, performance, and maintainability.
- Handled deployment, staging environments, and version control via Git, GitHub, and CI/CD pipelines.
- Worked closely with cross-functional teams to plan features, scope technical requirements, and deliver on project timelines.

Web Developer — **Force24**, Leeds

JULY 2016 - JUNE 2021

- Built and maintained responsive landing pages using PHP, HTML, CSS, and JavaScript, optimised for performance and conversion.
- Developed and integrated email templates into internal platforms and third-party tools (Mailchimp, HubSpot).
- Collaborated with marketing and design teams to implement campaign-specific pages and track user engagement.
- Created backend scripts for form handling, lead capture, and tracking, linking seamlessly to CRM systems.

Education

BSc (Hons) Web Technologies,
University of Huddersfield

SEPTEMBER 2013 - JULY 2016

- Focused on front-end and back-end web development using HTML, CSS, JavaScript, PHP, and MySQL.
- Completed modules in Web Programming, UX/UI Design, E-commerce Systems, and Software Engineering.
- Final year project: Developed a fully responsive e-commerce platform using Laravel.
